

ANNUAL PRODUCTION SALE / FRIDAY, MARCH 25, 2022

1:00 PM / AT THE RANCH NEAR BANCROFT, IDAHO

**PROFITABLE BALANCED BREEDING,
SUPERIOR IN FUNCTION**

Welcome to our 12th annual production sale! We appreciate your interest and continued support to our program. We are fully committed to improving our genetics each and every generation for our customers. We aim to help you achieve your breeding goals and to be successful in your endeavors.

We practice the art of fine breeding and use intense sire selection, careful line breeding, and innovative corrective matings to achieve this. We strive for "Balanced Breeding Superior in Function". We utilize the best bulls that we can find to meet the needs of our cowherd. We want our cattle to be functional, productive, and the low maintenance kind with excellent dispositions and longevity.

Our cowherd is ran similar to most commercial operations with the exception of single bull breeding pastures and records. We operate on non-irrigated native pastures with only salt and mineral supplementation.

The bulls in this offering were fed in a 30 acre pasture with long hay and a mild grain mix. These bulls have not had any silage or hot feed to ensure soundness. They are well grown but not over conditioned like most that sell nationally. The heifers are managed in a similar way but fed only long hay and must travel to water, salt and mineral.

We have on offer some of the most unique genetics in the industry. One would be hard pressed to find these woven bloodlines anywhere else. Then add to it the age, environment, and management of our bulls, we are not conventional to say the least. We dare to be different, challenge the fads, and design our cattle to work for you, not you for them.

Feel free to contact us about viewing the cattle prior to the sale. Our cattle are affordable and we want you to be happy with your purchase. We can assist in marketing your calves if desired.

We truly feel we have a very unique, well designed product, and know that our cattle are hand crafted with attention to detail. We don't breed for big numbered EPD's or use the bull of the month. Think of it as a small rare find not mass produced in factories. We feed, breed, manage, tag, sort, clip and have our hands on every aspect of our cattle.

We will offer to feed the yearling bulls at no charge until May 1, 2022.

Please note that we do not PAP test to be trendy. Our ranch is 5600 ft elevation and we run up to 8500 ft. elevation, never lower. We lose Angus cattle every year to High Mountain Disease in our herd. Mother nature is the best at culling at this setting.

If any of this finds appeal in your mind, come have lunch, evaluate our cattle and make your own decision as to who you want your seedstock producer to be.

Dirk and Marnie Johnson

Cell: 208-390-6619 / Home: 208-425-9169

ANNUAL PRODUCTION SALE / FRIDAY, MARCH 25, 2022

1:00 PM / AT THE RANCH NEAR BANCROFT, IDAHO

LUNCH - SMOKED BRISKET STARTING AT 11:30

OFFERING OVER 100 HEAD! / 60 REGISTERED YEARLING BULLS

[Negative BVD-PI Tested, Performance Tested, Fertility Tested and PAP Tested]

10 REGISTERED AND 35 COMMERCIAL ANGUS & FLECKANGUS YEARLING HEIFERS

SALE DAY PHONES

Dirk Johnson208-390-6619

Marnie Johnson208-540-2697

Riley Mickelson208-989-0800

SALE LOCATION

2055 Ivins Road, Bancroft, Idaho 83217

30 miles East of I-15 on Hwy 30. Do not take the Bancroft turn off. Go to the intersection of Hwy 30 and Hwy 34 (Grace turnoff) turn North onto Old Hwy 30 (frontage road) continue West for 2 miles. Then turn right onto Ivins Road, cross railroad tracks, then 4 miles to the ranch.

AUCTIONEER & STAFF

Kade Rogge, Auctioneer 208-431-0074

Mark Schumann, Ringman..... 208-339-0580

Jed South, Ringman 208-670-4042

Riley Mickelson, Special Assignment. 208-989-0800

LIABILITY

All persons who attend the sale do so at their own risk, and Vertical Edge Genetics assumes no liability, legal or otherwise for any accidents which may occur.

ANNOUNCEMENTS

Announcements from the block will take precedence over information in this sale book. Cattle will sell in catalog order.

INSURANCE

Insurance will be made available to new owners at the clerk's desk.

TRUCKING

Please leave detailed information with sale clerk about trucking needs and arrangements. We will work to help you find the best and most efficient means for hauling. We can assist in delivery of bulls to your ranch.

FEEDING

We will offer to feed the yearling bulls at no charge until May 1, 2022, if desired. At that time, we will arrange trucking options. We are not responsible for any injury or death to the bulls while in our care. We would recommend insuring the animal.

VET SERVICES

Dr. Daniel Erickson, DVM 307-887-8838

ACROSS - BREED EPD TABLE

Do not compare Angus and SimAngus EPDs unless you add the following to the Simmental EPD:

BW 1.7 WW -16.2 YW -25.5 Milk -2.8 Marb -0.19 RE 0.50

VIDEO

Videos will be available online two weeks prior to the sale at www.verticaledgegenetics.com

TERMS & CONDITIONS

All cattle sell under their respective breed association's terms and conditions. You can view them online,

American Angus Association: https://www.angus.org/pub/suggested_sale_terms.pdf

American Simmental Association: <http://simmental.org/site/userimages/sale%20terms.pdf>

RESOURCES

American Simmental Association, and the American Angus Association, AHIR, Angus Source, CAB, Pathfinder. EPDs current as of February 20, 2022. Updated EPDs can be viewed on respective websites.

HERD HEALTH

All cattle selling are pedigree free of known genetic defects including AM, NH, CA, DD and TH.

BULLS

- 2x 8-way vaccine
- 2x Fusoguard (Hoof Rot) vaccine
- 2x Bovi-shield Gold One Shot vaccine
- 2x Multimin 90
- Poured with Clean-Up
- Dewormed with Valbazen
- Negative BVD-PI
- PCR Trich Test
- Semen and PAP tested

HEIFERS

- 2x 8-way vaccine
- 1x Preg Guard 10
- 1x Multimin 90
- Poured with Clean-Up
- Dewormed with Valbazen
- Negative BVD-PI
- Calfhood vaccinated

SIGHT UNSEEN PURCHASE PROGRAM

We know our cattle and cow families very well and are happy to share our knowledge with you to help you make an informed decision. If you are unable to attend the sale and are interested in a bull or heifer, give Dirk a call and he will personally go over the sale cattle for your program to recommend bulls or heifers that will suit your needs. Your complete satisfaction is our goal! You are welcome to leave a bid with any of the sales staff. Cattle will sell in catalog order.

ABSENTEE BIDDING

We will sell animals in catalog order. If preferred, we can have someone call you on specific lots with prior arrangements. We will also have a few phone lines dedicated to bidding on sale day but please make arrangements prior to 11:00 am on sale day. We are also happy to announce that we will have CCI.LIVE on the scene offering online bidding.

Watch the Sale Live Online...

View the sale from your phone, tablet, or desktop computer and bid with confidence! Visit www.CCI.live for complete sale information and online registration. If this is your first time to CCI.live, visit the web page and get approved for bidding at least three hours prior to sale time. With good internet speeds you can enjoy the sale from any location and bid with confidence.

CCI.LIVE

ONLINE BIDDING - Catalog - Videos - Sale Order - Plus More!

FIRST YEAR BREEDING GUARANTEE

All bulls selling for over \$3500 or more will be given 50% of the value of the injured bull, minus any salvage value, in a future sale or toward a replacement bull, if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2022. Breeding season is defined as the 90-day period following the first turnout of the bulls. A copy of the sales receipt must be received by Vertical Edge Genetics to receive proper credit.

Example 1: A \$4000 bull is injured and will not heal. A credit of \$2000 minus any salvage will be given to the buyer.

Example 2: A \$2500 bull is injured and will not heal. No credit is given. Buyer retains all salvage value.

618 is a maternal brother to HAR Pinebank 202 from the famed DDA Stella 443 cow. These are foundation Angus genetics that excel in forage based programs. We like the growth, type, and bold sprung mass in these cattle. His daughters resemble the 443 cow in their wedge-shaped maternal design. PAP 43

A polled/s purebred black Simmental that is 50% Fleckvieh. A stout rip that can be viewed on sale day. Used heavily last season. PAP 40

SIMANGUS

We have been breeding multi-generational SimAngus cattle for many years. We have found more predictability and functionality in our herd by linebreeding to the genetics which have excelled in our environment. We love the performance, mothering ability and fertility in our SimAngus cows. Newborn calf vigor is excellent, marketing demand for SimAngus sired calves is strong, and they produce a superior end product. Our prefix has included JB, JBD, and now VE and dates back to 1983. We have found the Fleckvieh influenced SimAngus to be superior to the average SimAngus cattle. Our focus will remain to offer these FleckAngus bulls in volume, unlike those available elsewhere.

YEARLING BULLS

How to Bid Online

Tips and Tricks to Master Online Bidding

STEP 1. Use Chrome or Safari, a newer browser or download the CCI live app at Google Play or Apple App store.

STEP 2. Open your app or go to the address of www.CCI.live in your browser. CCI.live can be used on a cell phone, tablet, laptop or desktop. Some older models may not be compatible and will show a yellow caution symbol if so.

STEP 3. Create an account and then request bidding credentials through CCI.live. Use the bank information listed on your check. Please use a correct phone and email address.

STEP 4. Once you are accepted for bidding credentials you will receive a text message and/or email notification. Proceed to "Get Buyer Number" on the actual sale page of your interest. Some sales may also require a PASSCODE to obtain a buyer number. On these auctions, you will obtain passcodes from the sale office phone number for the specific auction you are interested in. Please closely read the terms!

STEP 5. You are ready to go! Make sure you understand, once you are logged in, have a buyer number and are watching the sale that you are on a highly sensitive web page. Be careful when scrolling that you do not accidentally hit the bid button and watch children closely as they tend to grab cell phones and accidentally bid.

TIPS FOR SUCCESSFUL BIDDING

- Make sure you have good service. Bidding and driving is not recommended. You should have two - three bars on your cellular devices. At home you should have an UPLOAD speed of 2 mg or more UP. Use this site to test your internet: www.speedtest.net.

REFRESH YOUR SCREEN AT SALE TIME

If you have logged in over an hour prior to sale time, you may need to login again. DO NOT let the computer set idle and then return and try to bid, the website may have logged you out.

CCI.live does not accept payment, you will pay the sale management or the farm directly. View HELP VIDEOS at www.cci.live.

ANGUS

Our Angus are very unique, linebred, maternally efficient, and sound cattle. We are strict in our genetic selection to avoid extremes and potential defective lethal genes. We want moderate, robust, well muscled bulls to exhibit breed character, libido, and produce those easy to manage black hided cow herds. We have steered clear of genetic defects because of our long standing awareness of dirty pedigrees. We will not sell carriers of a genetic defect or commercial bulls of unknown parentage. We list the EPDs that we have found to be the most important in real world ranching.

PB Angus. We have never assisted a 618 sired calf, yet they weigh a little more at birth. Grand dam earned Pathfinder Status in the Angus breed. Dam's production 6 @ 103.

FLECKVIEH

Our nucleus herd of Fleckvieh are being developed in our same rugged conditions of the west that the rest of the herd experience. We are striving for moderate framed, easy fleshing, brilliant uddered females to produce some of the few fullbloods available in Idaho and surrounding states. We are also developing many polled individuals to appeal to more customers. We produce non-diluters so there is no chance of getting grey calves. In our experience the Fleckvieh cattle have the lowest PAP scores and thrive in elevated regions.

20 COMMERCIAL OPEN HEIFERS

20 HEAD - COMMERCIAL ANGUS & SIMANGUS HEIFERS

Commercial, open yearling heifers, home raised. Gate cut of 5. Dewormed and spring vaccinated.

TEAM

70

DRAFT HORSE TEAM

Goldie - Belgian Mare: 16 hand, 14 years old. Bred to Boomer, Belgian Stallion due April -May 2022. Goyle - Brabant Cross Mare: 16 1/2 hand, 10 years old. Bred to Boomer, Belgian Stallion due May - June 2022. Mares are a well broke ranch team. Consigned by Clint Hallam (307) 747-4802.

QUICK REFERENCE TO EPDs AND \$ INDEXES

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first calf heifers.

Birth Weight (BW), Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to other sires.

Yield Grade (YG), Yield grade score.

All-Purpose Index (API) [SIMMENTAL], evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Cow Energy Value (\$EN) [ANGUS], expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Weaned Calf Value (\$W) [ANGUS], the expected average difference in future progeny performance for pre-weaning merit, expressed in \$/head. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F) [ANGUS], calculates a \$/head difference in expected progeny performance for post weaning merit. \$F uses WW and YW EPDs along with trait interrelationships. Typical feedlot grain value, feed consumption and cost differences are accounted for in the final calculations.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

PULMONARY ARTERIAL PRESSURE TEST (PAP)

The Pulmonary Arterial Pressure Score or PAP Score is a tool that when utilized properly can be helpful in preventing and reducing the incidence of High Altitude Disease. The classic signs of High Altitude Disease are lethargy, edema of the brisket, pneumonia like symptoms and diarrhea. This disease can manifest in a variety of subtle ways as well such as poor fertility, chronic pneumonia, poor weight gain. The score is achieved by placing a long catheter into the main pulmonary artery which is the first artery leaving the right side of the heart and entering the lungs. A mean pressure is recorded at this location which becomes the particular animal's PAP Score. In general the lower the score the less likely an animal will develop High Altitude Disease and since the PAP score is a highly heritable trait using herd sires and dams with lower scores will reduce the incidence in calves as well. Many factors are involved in the final score of a particular animal such as altitude, time at altitude, age at test, handling methods, previous sickness etc... In addition with the wide variability of the end environment of the bull it is difficult to apply a concrete "cut off" score for everyone but should be readily used when comparing bulls in a particular sale. Feel free to call with any questions on High Altitude Disease and how to utilize PAP score in our herd. Jeremy Ley, DVM, Fourmile Veterinary Clinic, LLC. 401 Lincoln Avenue, Canon City, CO 81212 (719)425-5687.
