

ANNUAL PRODUCTION SALE / FRIDAY, MARCH 24, 2023

1:00 PM / AT THE RANCH NEAR BANCROFT, IDAHO

**PROFITABLE BALANCED BREEDING,
SUPERIOR IN FUNCTION**

Welcome to our 13th annual production sale! We truly appreciate your interest and continued support to our program. Our slogan of “Profitable Balanced Breeding, Superior in Function” is our long standing commitment to improving our genetics every generation. We want to see improvement in our cowherd which translates into a better offering of bulls to our customers.

We offer unique, outcross genetics from the common mainstream gene pool. We use what works best in our environment with strict culling practices on fertility, foot quality, disposition, and udder and teat design. Our breeding decisions are not based on exaggerated EPD’s, popularity, or catchy phrases that seem to be in vogue. We know that the bulk of our customers run commercial operations and we raise our cattle as similar as possible to what the cattle will experience at their new homes.

The bulls on offer are fed long hay and a mild grain mix in a 30 acre pasture with spring water and salt and mineral. We feel this is a great way to develop these bulls for longevity and soundness. We PAP tested these bulls in February at the ranch elevation of 5800 ft. Our herd runs up to 8500 ft. elevation but never lower than the ranch location.

We truly feel we have a well designed product, and know that our cattle are hand crafted with attention to detail. Think of it as a small rare find not mass produced in factories. We feed, breed, manage, tag, sort, clip and have our hands on every aspect of our cattle. If any of this finds appeal in your mind, come have lunch, evaluate our cattle, and make your own decision as to who you want your seed-stock producer to be.

We will offer to feed the yearling bulls at no charge until May 1, 2023.

Dirk and Marnie Johnson

Cell: 208-390-6619 / Home: 208-425-9169
2055 Ivins Road • Bancroft, ID 83217 / simroot57@yahoo.com

SALE DAY PHONES

Dirk Johnson208-390-6619

Marnie Johnson208-540-2697

Riley Mickelson208-989-0800

SALE LOCATION

2055 Ivins Road, Bancroft, Idaho 83217

30 miles East of I-15 on Hwy 30. Do not take the Bancroft turn off. Go to the intersection of Hwy 30 and Hwy 34 (Grace turnoff) turn North onto Old Hwy 30 (frontage road) continue West for 2 miles. Then turn right onto Ivins Road, cross railroad tracks, then 4 miles to the ranch.

AUCTIONEER & STAFF

Kade Rogge, Auctioneer 208-431-0074

Mark Schumann, Ringman..... 208-339-0580

Jed South, Ringman 208-670-4042

Riley Mickelson, Special Assignment..... 208-989-0800

LIABILITY

All persons who attend the sale do so at their own risk, and Vertical Edge Genetics assumes no liability, legal or otherwise for any accidents which may occur.

ANNOUNCEMENTS

Announcements from the block will take precedence over information in this sale book. Cattle will sell in catalog order.

INSURANCE

Insurance will be made available to new owners at the clerk's desk.

TRUCKING

Please leave detailed information with sale clerk about trucking needs and arrangements. We will work to help you find the best and most efficient means for hauling. We can assist in delivery of bulls to your ranch.

FEEDING

We will offer to feed the yearling bulls at no charge until May 1, 2023, if desired. At that time, we will arrange trucking options. We are not responsible for any injury or death to the bulls while in our care. We would recommend insuring the animal.

VET SERVICES

Dr. Daniel Erickson, DVM 307-887-8838

ACROSS - BREED EPD TABLE

Do not compare Angus and SimAngus EPDs unless you add the following to the Simmental EPD:

BW 1.9 WW -13.0 YW -25.7 Milk -2.3 Marb -0.15 RE 0.50

VIDEO

Videos will be available online two weeks prior to the sale at www.verticaledgegenetics.com

TERMS & CONDITIONS

All cattle sell under their respective breed association's terms and conditions. You can view them online,

American Angus Association: https://www.angus.org/pub/suggested_sale_terms.pdf

American Simmental Association: <http://simmental.org/site/userimages/sale%20terms.pdf>

RESOURCES

American Simmental Association, and the American Angus Association, AHIR, Angus Source, CAB, Pathfinder. EPDs current as of February 21, 2023. Updated EPDs can be viewed on respective websites.

HERD HEALTH

All cattle selling are pedigree free of known genetic defects including AM, NH, CA, DD and TH.

BULLS

- 2x 8-way vaccine
- 2x Fusoguard (Hoof Rot) vaccine
- 2x Bovi-shield Gold One Shot vaccine
- 2x Multimin 90
- Poured with Clean-Up
- Dewormed with Valbazen
- Negative BVD-PI
- PCR Trich Test
- Semen and PAP tested

HEIFERS

- 2x 8-way vaccine
- 1x Preg Guard 10
- 1x Multimin 90
- Poured with Clean-Up
- Dewormed with Valbazen
- Negative BVD-PI
- Caltfoot vaccinated

SIGHT UNSEEN PURCHASE PROGRAM

We know our cattle and cow families very well and are happy to share our knowledge with you to help you make an informed decision. If you are unable to attend the sale and are interested in a bull or heifer, give Dirk a call and he will personally go over the sale cattle for your program to recommend bulls or heifers that will suit your needs. Your complete satisfaction is our goal! You are welcome to leave a bid with any of the sales staff. Cattle will sell in catalog order.

ABSENTEE BIDDING

We will sell animals in catalog order. If preferred, we can have someone call you on specific lots with prior arrangements. We will also have a few phone lines dedicated to bidding on sale day but please make arrangements prior to 11:00 am on sale day. We are also happy to announce that we will have CCI.LIVE on the scene offering online bidding.

Watch the Sale Live Online...

View the sale from your phone, tablet, or desktop computer and bid with confidence! Visit www.CCI.live for complete sale information and online registration. If this is your first time to CCI.live, visit the web page and get approved for bidding at least three hours prior to sale time. With good internet speeds you can enjoy the sale from any location and bid with confidence.

CCI.LIVE

ONLINE BIDDING - Catalog - Videos - Sale Order - Plus More!

FIRST YEAR BREEDING GUARANTEE

All bulls selling for over \$3500 or more will be given 50% of the value of the injured bull, minus any salvage value, in a future sale or toward a replacement bull, if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2023. Breeding season is defined as the 90-day period following the first turnout of the bulls. A copy of the sales receipt must be received by Vertical Edge Genetics to receive proper credit.

Example 1: A \$4000 bull is injured and will not heal. A credit of \$2000 minus any salvage will be given to the buyer.

Example 2: A \$2500 bull is injured and will not heal. No credit is given. Buyer retains all salvage value.

"Auto" has earned his stripes here with a tremendous 1st calf crop. His calves are smart with good newborn vigor and then take off and grow. Consistency on display from his line breeding. PAP 40.

SIMANGUS

We have been breeding multi-generational SimAngus cattle for many years. We have found more predictability and functionality in our herd by linebreeding to the genetics which have excelled in our environment. We love the performance, mothering ability and fertility in our SimAngus cows. Newborn calf vigor is excellent, marketing demand for SimAngus sired calves is strong, and they produce a superior end product. Our prefix has included JB, JBD, and now VE and dates back to 1983. We have found the Fleckvieh influenced SimAngus to be superior to the average SimAngus cattle. Our focus will remain to offer these FleckAngus bulls in volume, unlike those available elsewhere.

Smooth Polled, Black Blaze 1/2 SimAngus. We hand picked a few Angus cows to breed to Justus with hopes of some grand F1 females, but bulls make more daughters than cows. If a cow is good enough to flush, use a son! Highly recommended! Dam's production 3 @ 101, Grand dam's 6 @ 103. (1/2 Fleckvieh influence) Retaining 1/2 semen interest.

YEARLING BULLS

How to Bid Online

Tips and Tricks to Master Online Bidding

STEP 1. Use Chrome or Safari, a newer browser or download the CCI live app at Google Play or Apple App store.

STEP 2. Open your app or go to the address of www.CCI.live in your browser. CCI.live can be used on a cell phone, tablet, laptop or desktop. Some older models may not be compatible and will show a yellow caution symbol if so.

STEP 3. Create an account and then request bidding credentials through CCI.live. Use the bank information listed on your check. Please use a correct phone and email address.

STEP 4. Once you are accepted for bidding credentials you will receive a text message and/or email notification. Proceed to "Get Buyer Number" on the actual sale page of your interest. Some sales may also require a PASSCODE to obtain a buyer number. On these auctions, you will obtain passcodes from the sale office phone number for the specific auction you are interested in. Please closely read the terms!

STEP 5. You are ready to go! Make sure you understand, once you are logged in, have a buyer number and are watching the sale that you are on a highly sensitive web page. Be careful when scrolling that you do not accidentally hit the bid button and watch children closely as they tend to grab cell phones and accidentally bid.

TIPS FOR SUCCESSFUL BIDDING

- Make sure you have good service. Bidding and driving is not recommended. You should have two - three bars on your cellular devices. At home you should have an UPLOAD speed of 2 mg or more UP. Use this site to test your internet: www.speedtest.net.

REFRESH YOUR SCREEN AT SALE TIME

If you have logged in over an hour prior to sale time, you may need to login again. DO NOT let the computer set idol and then return and try to bid, the website may have logged you out.

CCI.live does not accept payment, you will pay the sale management or the farm directly. View HELP VIDEOS at www.cci.live.

ANGUS

Our Angus are very unique, linebred, maternally efficient, and sound cattle. We are strict in our genetic selection to avoid extremes and potential defective lethal genes. We want moderate, robust, well muscled bulls to exhibit breed character, libido, and produce those easy to manage black hided cow herds. We have steered clear of genetic defects because of our long standing awareness of dirty pedigrees. We will not sell carriers of a genetic defect or commercial bulls of unknown parentage. We list the EPDs that we have found to be the most important in real world ranching.

FLECKVIEH

Our nucleus herd of Fleckvieh are being developed in our same rugged conditions of the west that the rest of the herd experience. We are striving for moderate framed, easy fleshing, brilliant uddered females to produce some of the few fullbloods available in Idaho and surrounding states. We are also developing many polled individuals to appeal to more customers. We produce non-diluters so there is no chance of getting grey calves. In our experience the Fleckvieh cattle have the lowest PAP scores and thrive in elevated regions.

LOT 66 TEAM

TEAM **DRAFT HORSE TEAM**

66

This is a really nice team of Percheron mares that will make you a great sleigh or wagon team. Dolly is 10 years old and currently in foal to our Belgian stud, Boomer. June is a 16 year old mare and open. She was previously used as a hitch horse team before we got her. They are currently being used as a feed team for our cows and horses. You can't go wrong with these gals! Consigned by Clint Hallam, 307-747-4802.

TEAM **DRAFT HORSE TEAM**

67

Older team of Percheron geldings. They are around 24 years old but still lots of life in them. They have mostly been used for feeding cows their whole life, hooked to sleigh or feed wagon. They have been to the Caribou County Fair a few times and showed, and they have pulled a wagon at two different weddings to haul people. They have also pulled two different hearses from Hooper church in Soda to the cemetery in Soda. I've fed cows with them by myself for 3 years. Consigned by Ty Nuffer, 208-574-2244

LOT 67 TEAM

QUICK REFERENCE TO EPDs AND \$ INDEXES

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first calf heifers.

Birth Weight (BW), Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to other sires.

Yield Grade (YG), Yield grade score.

All-Purpose Index (API) [SIMMENTAL], evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Cow Energy Value (\$EN) [ANGUS], expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Weaned Calf Value (\$W) [ANGUS], the expected average difference in future progeny performance for pre-weaning merit, expressed in \$/head. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F) [ANGUS], calculates a \$/head difference in expected progeny performance for post weaning merit. \$F uses WW and YW EPDs along with trait interrelationships. Typical feedlot grain value, feed consumption and cost differences are accounted for in the final calculations.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

PULMONARY ARTERIAL PRESSURE TEST (PAP)

The Pulmonary Arterial Pressure Score or PAP Score is a tool that when utilized properly can be helpful in preventing and reducing the incidence of High Altitude Disease. The classic signs of High Altitude Disease are lethargy, edema of the brisket, pneumonia like symptoms and diarrhea. This disease can manifest in a variety of subtle ways as well such as poor fertility, chronic pneumonia, poor weight gain. The score is achieved by placing a long catheter into the main pulmonary artery which is the first artery leaving the right side of the heart and entering the lungs. A mean pressure is recorded at this location which becomes the particular animal's PAP Score. In general the lower the score the less likely an animal will develop High Altitude Disease and since the PAP score is a highly heritable trait using herd sires and dams with lower scores will reduce the incidence in calves as well. Many factors are involved in the final score of a particular animal such as altitude, time at altitude, age at test, handling methods, previous sickness etc... IN addition with the wide variability of the end environment of the bull it is difficult to apply a concrete "cut off" score for everyone but should be readily used when comparing bulls in a particular sale. Feel free to call with any questions on High Altitude Disease and how to utilize PAP score in our herd. Jeremy Ley, DVM, Fourmile Veterinary Clinic, LLC. 401 Lincoln Avenue, Canon City, CO 81212 (719)425-5687.
